                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 9, Application US/08811583

Patent No. 6218142

GENERAL INFORMATION:
APPLICANT: Wassenegger, Michael
APPLICANT: Riedel, Leonhard
APPLICANT: Schlebel, Winfried
APPLICANT: NAN-TICE AND MOLECULES ENCODING
TITLE OF INVENTION: POLYPEPTIDES HAVING THE ENZYMATIC ACTIVITY OF AN TITLE OF INVENTION: NAN-DIRECTED RNA POLYMERASE (RGRP)
NUMBER OF SEQUENCES: 13
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Gaps

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Gaps
                                                                                                                                                                                                                                 US-09-620-412C-328/c
; Sequence 328, Application US/09620412C
; Sequence 328, Application US/09620412C
; Patent No. 6448234
; GENERAL INFORMATION:
TOTHE OF INVENTION: COMPOSITIONS AND METHODS FOR TREATMENT AND
TITLE OF INVENTION: COMPOSITIONS OF CHLANYDIAL INFECTION
TITLE OF INVENTION: DIAGNOSTS OF CHLANYDIAL INFECTION
CURRENT PAPLICATION NUMBER: US/09/620,412C
CURRENT FILING DATE: 2000-07-20
NUMBER OF SEQ ID NOS: 363
SEQ ID NOS: 363
LENGTHARE EASTSEQ for Windows Version 3.0/4.0
LENGTH: 2148
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Query Match 0.5%; Score 18; DB 4; Length 2148; Best Local Similarity 100.0%; Pred. Patent No. 5804411

GENERAL INFORMATION:
APPLICANT: TAJIMA, HISAO
APPLICANT: TAJIMA, KITAGAMA, KOICHIRO
APPLICANT: OHNO, HIROYUKI
APPLICANT: OHNO, TOSHIO
TITLE OF INVENTION: A No. 5804411el Polypeptide of Protein pl40
TITLE OF INVENTION: and DNAs encoding it
NUMBER OF SEQUENCES: 16
CORRESPONDENCE ADDRESS:
ADDRESSEE: SUGHRUE, MICN, ZINN, MACPEAK & SEAS
STREET: 2100 Pennsylvania Avenue, N.W.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Length 4027;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 3, Application US/08571785
Patent No. 2804411
GENERAL INFORMATION:
APPLICANT: TAJIMA, HISAO
APPLICANT: KITAGAWA, KOICHIRO
APPLICANT: OFFNO, TOSHIO
TITLE OF INVENTION: A No. 5804411e1 Polypeptide of Protein p140
TITLE OF INVENTION: and DNAs encoding it
NUMBER OF SEQUENCES: 16
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         NAME/KEY: CDS
LOCATION: 262.3243
IDENTIFICATION METHOD: by similarity to some other pattern
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           0.5%; Score 18; DB 1; Length 4027;

Patent No. 6221597
GENERAL INFORMATION:
APPLICAMT: ROBERTS, Christopher J.
TITLE OF INVENTION: ESSENTIAL GENES OF YEAST AS TARGETS FOR ANTIFUNCAL
TITLE OF INVENTION: AGENIS, HERBICIDES, INSECTICIDES AND ANTI-PROLIFERATION
TITLE OF INVENTION: DRUGS
FILE REFERENCE: 9301-048
CURRENT APPLICATION NUMBER: US/09/315,793
CURRENT FILING DATE: 1999-05-21
NUMBER OF SEQ ID NOS: 62
SOFTWARE: Patentin Ver. 2.0

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        US-08-991-840A-1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 130, Application US/08927219

Patent No. 6187533
GENERAL INFORMATION:

PAPLICANT: Bell, Graeme I.
APPLICANT: Bell, Garame I.
APPLICANT: Bell, Damela J.
APPLICANT: Maisaki, Pamela J.
APPLICANT: Marzel, Stephen
APPLICANT: Menzel, Stephen
TITLE OF INVENTION: MUTATIONS IN THE DIABETES SUSCEPTIBILITY
TITLE OF INVENTION: GENES HEPATOCYTE NUCLEAR FACTOR (HNF) 1 ALPHA, HNF-1BETA
NUMBER OF SEQUENCES: 147
CORRESPONDENCE ADDRESS:
                                                                                                           NUCLEOSIDE TRANSPORT
APPLICANT: Crawford, Charles R. .
APPLICANT: Patel, Divyen
TITLE OF INVENTION: A NITROBENZYLMERCAPTOPURINERIBOSIDE
TITLE OF INVENTION: A NITROBENZYLMERCAPTOPURINERIBOSIDE
TITLE OF INVENTION: NEMBRA - INVENTION: SEQUENCE: A SEQUENCE: 22
TITLE OF INVENTION: USE
NUMBER OF SEQUENCE: 22

Patent No. 6150502

GENERAL INFORMATION:
APPLICANT: Watson, James D.
APPLICANT: Strachan, Lorna
APPLICANT: Sleeman, Matthew
APPLICANT: Onrust, Rene
APPLICANT: Onrust, Rene
TILLE OF INVENTION: Compositions Isolated From Skin Cells
TITLE OF INVENTION: Compositions Isolated From Skin Cells
TITLE OF INVENTION: 11000.1011c1
CURRENT APPLICATION NUMBER: US/09/188,930A

CURRENT FILING DATE: 1998-11-09

NUMBER OF SEQ ID NOS: 348

SEQ ID NOS: 348

SEQ ID NO 206

MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/672,109B
FILING DATE: June 27, 1996
CLASSIFICATION: 536
ATTORNEY/AGBNT INPORMATION:
NAME: Smith, DeAnn F
REFERENCE/DOCKET NUMBER: 2115-000853DVC
TELEPHONE: (810)641-600
TELEPHONE: (810)641-600
TELEPKS: (810)641-600
TELEPKS: (810)641-600
TELEPKS: (810)641-6270
SEQUENCE CHARACTERISTICS:
LENGTH: 996 base pairs
TYPE: nucleic acid
STRANDEDNESS: double
Best Local Similarity 100.0%; Pred. No. 1.3e+02; Matches 17; Conservative 0; Mismatches 0;

5 CENERAL INFORMATION:

APPLICANT: Lalguidi, Raghunath V.

APPLICANT: Sherman, Bradlay K.

TILLE OF INVENTION: POLYNUCLEOTIDES AND POLYPEPTIDES DERIVED FROM CORN SEEDLING

FILE REFERENCE: PL-0012-1 CON

CURRENT FILLING DATE: 2001-08-06

PRIOR APPLICATION NUMBER: 09/298,329

PRIOR FILLING DATE: 1999-04-21

PRIOR PLICATION NUMBER: 60/085,331

PRIOR FILLING DATE: 1998-06-05

NUMBER OF SEQ ID NOS: 6332

SOFTWARE: PERL PROGram

SEQ ID NO 3754

LENTH: 150
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Length 170834;
                                  Sequence 7, Application US/09835232;
Patent No. US2002009848941;
GENERAL INFORMATION:
APPLICANT: Leader, Philip
TITLE OF INVENTION: Benjamin
TITLE OF INVENTION: ROBAIN-2 NUCLEIC ACIDS AND POLYPEPTIDES
TITLE OF INVENTION: ROBAIN-2 NUCLEIC ACIDS AND POLYPEPTIDES
TITLE OF INVENTION: AND USES THEREOF;
FILE REFERENCE: 00383/052002
CURRENT APPLICATION NUMBER: US/09/835,232
CURRENT APPLICATION NUMBER: US 60/196,811
PRIOR FILING DATE: 2000-04-13
PRIOR FILING DATE: 2000-04-13
SOFTWARE: FastSEQ for Windows Version 4.0
SEQ ID NO 7
LENGTH: 170834

Sequence 2934, Application US/09983965.

Sequence 2934, Application US/09983965.

Patent No. US20020137160A1

GENERAL INFORMATION:

APPLICANT: Waster, Wesley C.

APPLICANT: Byatt, John C.

APPLICANT: Byatt, John C.

APPLICANT: Mathialagan, Nagappan

APPLICANT: Mathialagan, Nagappan

TITLE OF INVENTION: NUCLEIC ACID AND OTHER MOLECULES ASSOCIATED WITH LACTATION AND

TITLE OF INVENTION: MUSCLE AND FAT DEPOSITION

TITLE OF INVENTION: MUSCLE AND FAT DEPOSITION

TITLE OF INVENTION: NUMBER: US/09/983,965

CURRENT APPLICATION NUMBER: US 09/465,231

PRIOR APPLICATION NUMBER: US 60/113,678

PRIOR PILING DATE: 1998-12-15

PRIOR PILING DATE: 1998-12-17

NUMBER OF SEQ ID NOS: 5912
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ö
